PAGE DESCRIPTION

Advanced Selector B

Filename: PANext_AdvancedSelector_Wireframes

FUNCTIONAL SPECIFICATIONS

- 1 Save Button - OnClick saves user changes to the students in session.
- 2 Discard Changes Button - OnClick discards changes, closes the window and returns the user to the previous screen visited.
- 3 Instructional Text - No action. Text will specify how to move students using the Advanced selector (B).
- 4 Student/Group Dropdown Menu - OnClick expands or collapses the menu. Selecting group changes the options in the From Dropdown menu to display groups.
- 5 From Dropdown Menu - OnClick expands or collapses an Advanced Selector (A) menu. The current organization being viewed by the user is listed as default.
- 6 To Dropdown Menu - OnClick expands or collapses an Advanced Selector (A) menu. The current session being viewed by the user is listed as default.
- 7 Students Available to Add Filter Input Field - onFocus activates the field, onKeyUp, sorts the text area data in range based on the user input and the data in the Students Available to Add select text area.
- 8 Students Available to Add Select Text Area - OnHover highlight row under the cursor. OnClick selects or deselects row.

Advanced Selector B: Row Selected

Filename: PANext_AdvancedSelector_Wireframes

FUNCTIONAL SPECIFICATIONS

- 1 Clear Button - OnClick** clears Students Available to Add Filter Input Field and resets the sort order of the Students Available to Add Select Text Area.
- 2 Selected Rows - OnClick** deselects row, command-click selects multiple rows. Selecting one or more rows in the Students Available to Add Select Text Area deselects any rows that may be selected in Students in Session Select Text Area.
- 3 Add Arrow - Active State:** When one or more rows in the Students Available to Add Select Text Area is selected, the add arrow is active, highlight the add arrow button.

OnClick moves the selected row(s) from the Students Available to Add Select Text Area to the Students in Session Select Text Area.
- 4 Reset Button - OnClick** clears the user edits and resets the form to its state before the user made changes.
- 5 Save Button - OnClick** saves the user edits, then closes the window and displays the last visited screen. Displays a confirmation notification.
