PAGE DESCRIPTION

## Notifications

Notifications allow the user to view page level configuration messages or session status alerts. There are four classes of notifications:

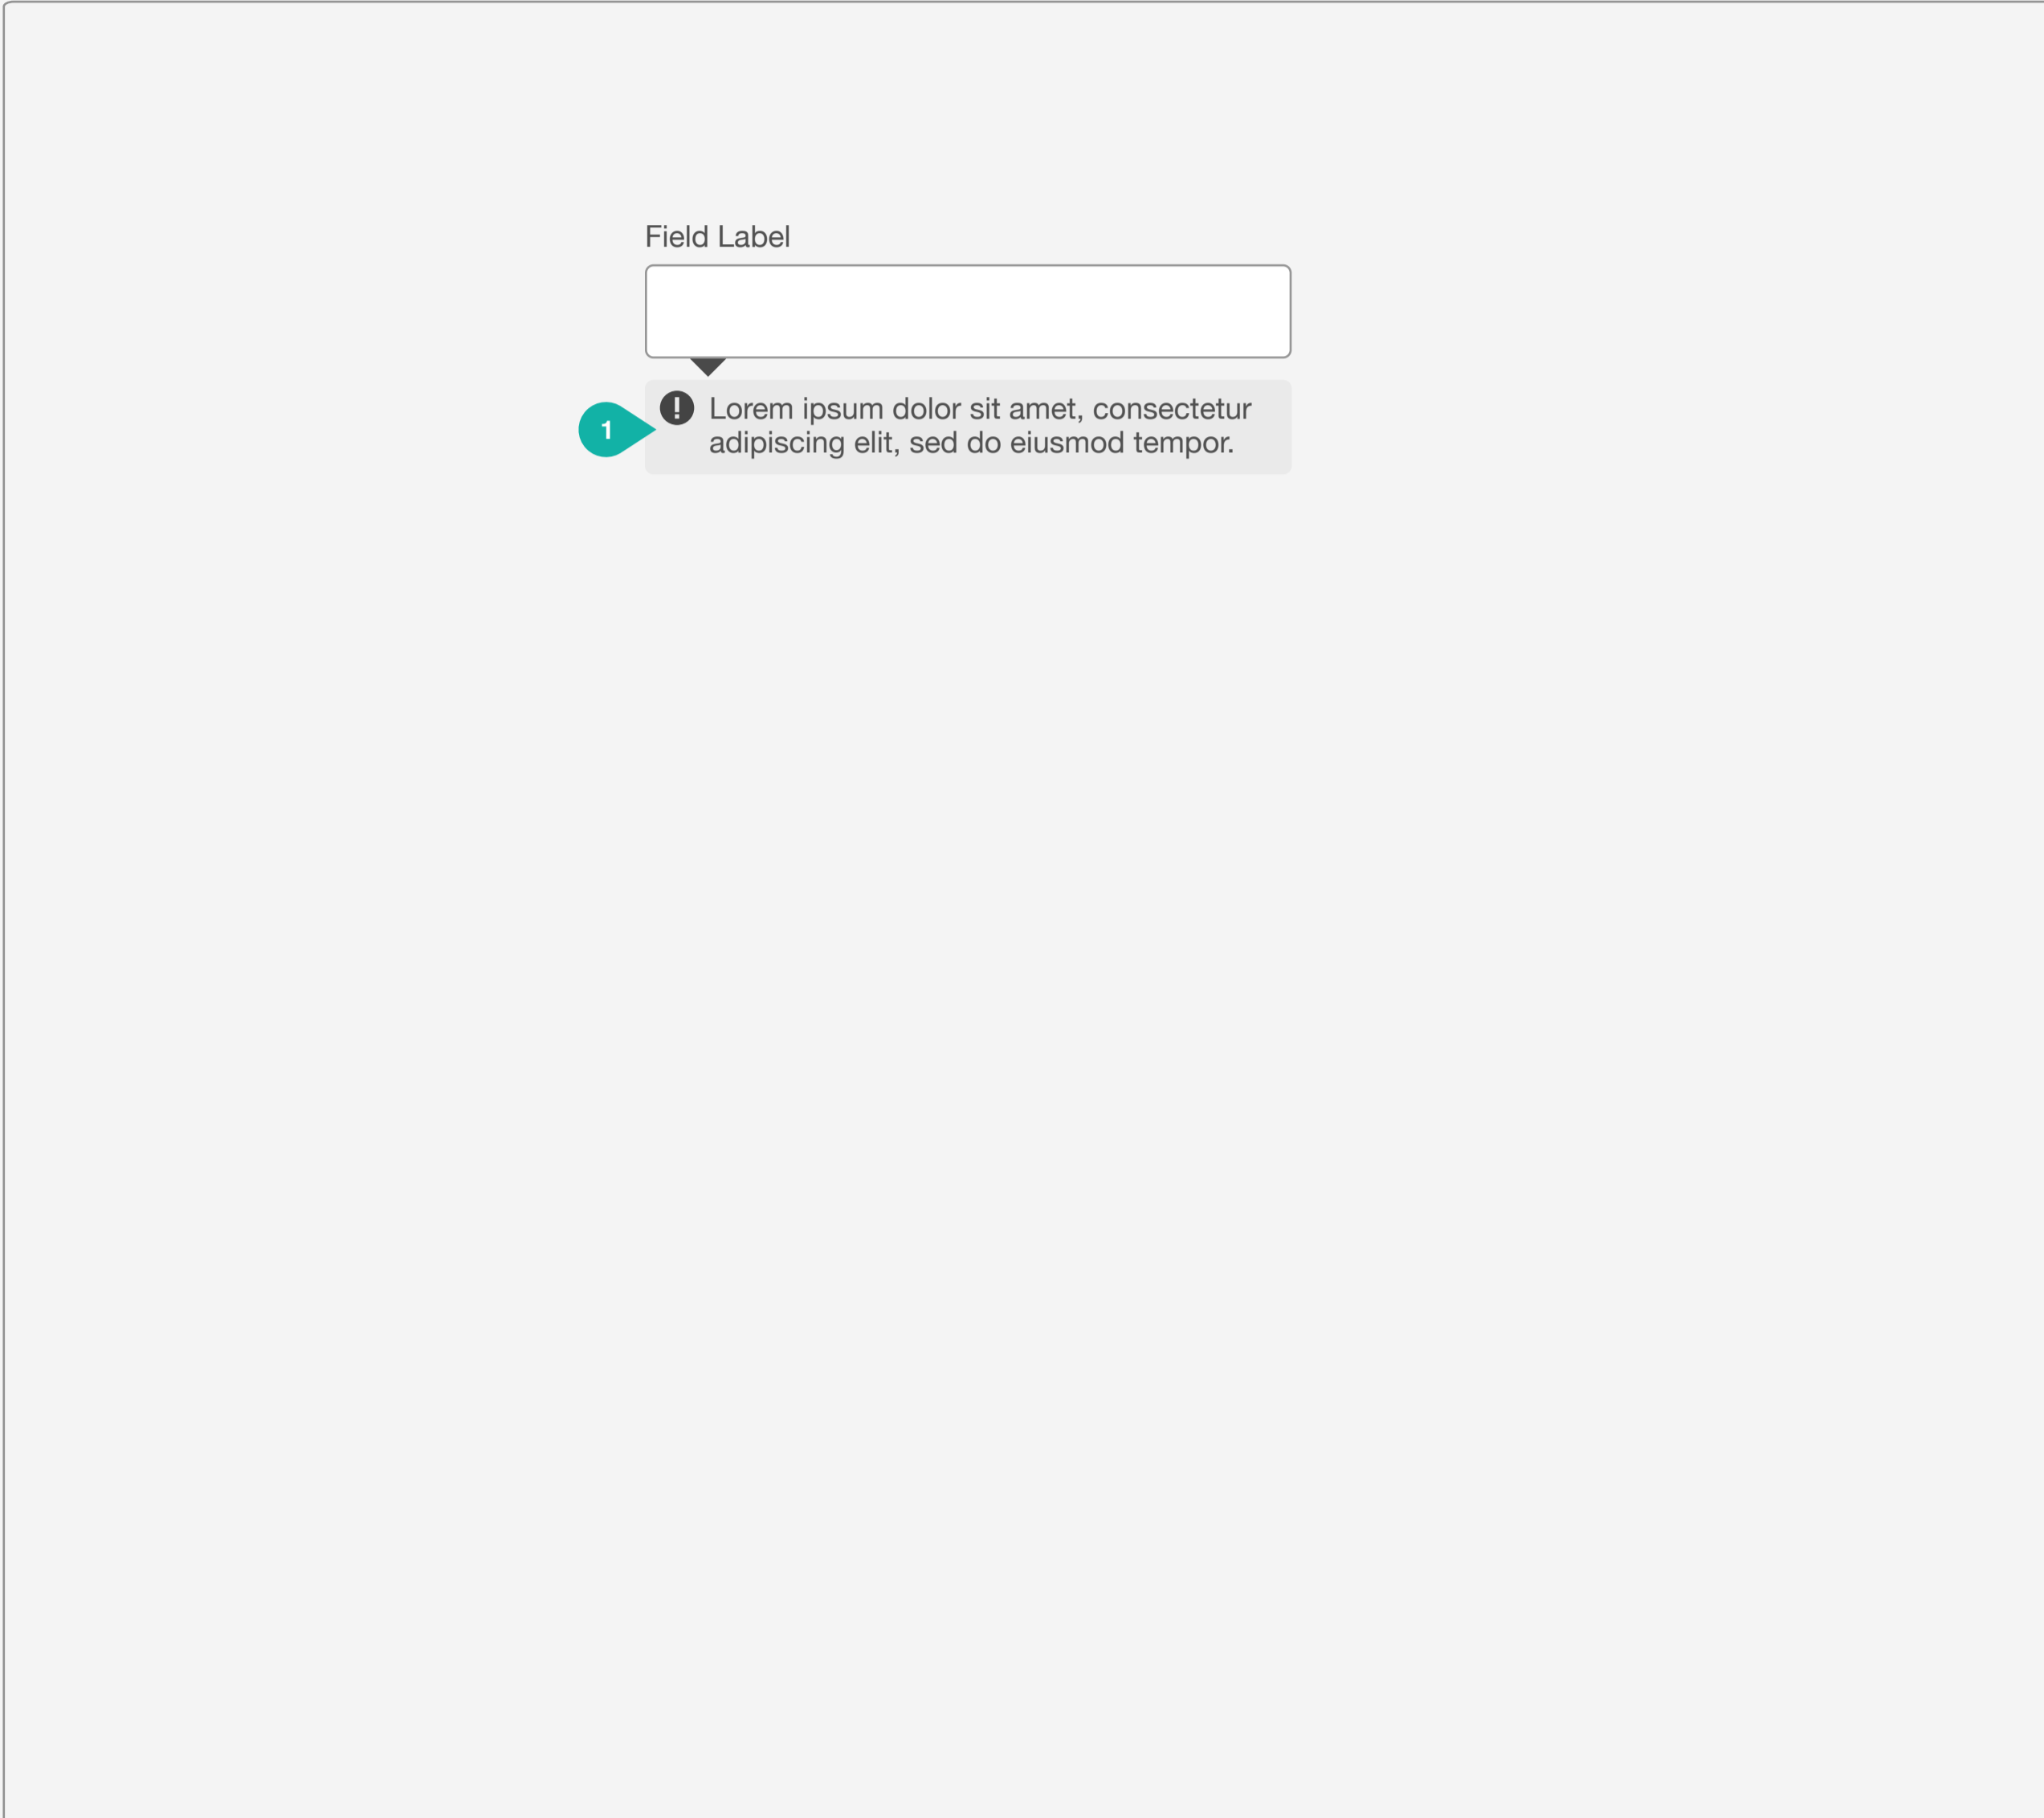

1. Critical notifications: includes urgent icon, most severe/urgent type of notification.
2. Session notification includes icon, important but not critical session updates/warning
3. Processing Notification: indicates to the user that they have successfully started a process that needs to be queued, i.g. processing files for download. Resolves to a confirmation or warning notification.
4. Confirmation messages includes icon, message indicating successful completion of a process.
5. Status notifications: includes icon, dismissible message indicates completion of user initiated task. Functional requirements will indicate the lifespan of each notification. The order shown is the default order if more than one notification is shown at a time.
